

Kanał izolacyjny ProtecTube 50mm Thermaflex

Manufacturer: **Thermaflex**

Referention number: **PROTECTUBE 50mm**

Condition:: **New**

Quantity: 0 pcs.

Information:

ProtecTube™ - insulation tube - ideal as universal protection for all types of cables and pipes sensitive to high temperature or high pressure

Full product description

■ Use:

- connecting the water system to solar water heaters
- the possibility to place connection pipes (steel, copper, plastic) directly in the ProtecTube™
- can be used for underground and overhead systems
- cable collisions on roadsides
- water treatment systems
- supply pipes for heat pumps
- under buildings
- on concrete substrates

■ Description:

- extremely durable and flexible system
- excellent protection against moisture and against traffic loads
- casing pipe with integrated insulation
- for temperatures from - 80°C to + 95°C

■ Technical data:

outer diameter:	50mm
tube diameter:	23-28mm
thickness of insulation:	11-13,5mm
color:	black
material:	Casing pipe: HPDE
Insulation:	polyolefin foam
cell structure of isolation:	closed cells
UV resistance:	Casing pipe: yes
working temperature:	- 80 °C do + 95 °C
water vapor diffusion resistance:	(μ) >3.500
fire classification:	B2

***price for one linear meter**
