

Magnesium Rod 370mm with plug 3/4" brass

Price: **34,00 PLN** gross

34,00 PLN for szt.

Manufacturer: - **Pro Eco Solutions Ltd.**

Referention number: **MAGNESIUM R 3/4 37BR**

Condition:: **New**

Quantity: 169 pcs.

Information:

Magnesium anode 370mm/22 M6 with 3/4" brass plug

Product features

Thread:	G 3/4"
Length:	37 cm
Plug:	brass
Diameter:	22 mm

Full product description

Use:

Magnesium anodes are used to provide anti-corrosion protection for domestic hot water tanks made of steel and covered with ceramic enamel. They can also be used as anti-corrosion protection in domestic hot water tanks to protect other elements (e.g. heaters, etc.)

The first check of the condition of the anode is recommended before the end of 24 months of operation of the tank. In the event of quick wearing, the anode should be replaced more frequently (every 12 months). If wearing is slower, it can be replaced every 18-24 months.

It is recommended to use an anode with a stainless steel plug for tanks made of stainless steel.

Technical data:

- diameter: 22 mm
- length 370 mm

- mounting rod: with M6 thread

- plug: with thread R3/4" brass

The plug may differ from the one shown in the photo.
